

XM radio represents a one-of-a-kind source for entertainment and news. It is a shame that due to XM's success in the industry it is being scrutized for providing local weather and traffic reports. The National Association of Broadcaster's petition 04-160 is a complete waste of time and of resources. XM's success is not something to be frowned upon; maybe the competition needs to step up to the plate.

I urge the FCC to reject NAB's petition 04-160. I use the XM Instant Traffic & Weather almost everyday. I pay for this service. And I expect XM to deliver to its customers what they demand.
